

# YARI

## **Crystalline short grain, suitable for Sushi processing**

- Plant height: 85 cms
- Vegetative Cycle: 140 days
- Pyricularia resistance : Medium
- Helminthosporium resistance: Medium
- Lodging resistance: High
- Tillering ability: High
- Plant senescence : Low
- Production: Good
- Seed Hectare Dose: 180/200 Kgs
- Type Grain: 5.1 x 3.1 mm
- Amylose: low

## **Technical advice:**

- Variety with high lodging resistance and low presence of damage grains
- Fractional manuring advice , avoid excess of nitrogen fertilization
- Fungicide treatment advice
- During maturation phase, guarantee the maintain of water, as long as possible
